

Warehouse Management and Stock Control

Remove the hassle of managing your warehouse and modernise the way it operates by using our management software solution that will centralise all warehouse information and the items held within it.

Our proven software solution, Pro-Cloud, can manage a complete business structure. It can be used for any central hub, whether that is a warehouse facility, storage room or even a cupboard. The system will be configured to suit your requirements and will map out each area of your warehouse to enable accurate asset storage and asset activity records. Whether you have a single location or multiple, Pro-Cloud will manage it all, ensuring updates are visible throughout. Warehouse areas can include but aren't limited to:

- Equipment storage
- Workshop areas
- Faulty equipment
- Vehicles stored on site

Once areas have been mapped out, our team will get to work adding them to the system and producing labels for accurate warehouse stock control.

With asset and inventory management at Pro-Cloud's core, the solution will ensure all assets are contained within your warehouse are always tracked and traced wherever they are located, with a full historic record of vital information.

Using the correct hardware and labelling options is paramount to ensure your warehouse is management effectively and the

Pro-Cloud software is maximised. We offer the most advanced labelling options, working with RFID, NFC, QR codes or barcodes, enabling you to track and trace warehouse locations, assets, and associated activities.

Through working closely with the unrivalled global hardware organisation **Zebra Technologies**, CSS can offer some of the best hardware solutions for the best possible price, ensuring you achieve maximum benefits when using our software.

The core hardware solutions we would recommend are:

ZT411 Industrial Label Printer

This printer has a rugged and durable design and is recommended for any organisation that requires high volume in a warehouse setting. Featuring advanced technology including a large colour touch display and versatile connectivity options- these printers take performance to a new level and are adaptable for your evolving needs.

ZD621 Label Printer

If you are looking for a portable mobile printer that can be transferred from location to location; we would recommend the **ZD621 label printer**. This premium desktop printer brings advanced industrial printing quality to a compact desktop printer, offering the fastest speeds and best quality in its class.

These hardware options are compatible with all labelling options and can be configured to individual requirements.

If you are looking to use the most advanced tagging option on the market, RFID, then the **RFD40 UHF RFID Sled** is a must to transform your mobile computers into RFID powerhouses. Decrease time spent on inventory checking with an industry-best 1300+ tag reads per second, optimised read range and increased battery capacity.

TC26 Mobile Computer

The ultimate cost-effective touch computer built for small and big businesses. Give your warehouse teams the tools they need to guarantee your entire warehouse is accurately managed effectively through the Pro-Cloud solution. The integrated mobile scanners capture all barcodes, ensuring your warehouse and stock is always digitally recorded and locations are constantly updated, reducing the loss of stock.

Initiate a joined-up software and hardware working approach and modernise the way your warehouse operates.
